

Supplementary agreement for adjustments of electrical reference standards

DIN ISO 17025:2018 specifies that an “as-found” calibration of test and measurement equipment must be conducted. If measured values are outside the specified error limits, an adjustment is required.

Help us to keep the lead time for the calibration of your devices as short as possible by filling out the following lines!

Type of calibration DAKkS calibration certificate ISO calibration certificate

We assume that the measuring instrument is not in a calibratable condition. Short error description:

Procedure if measured values are outside the specifications:

Possible repair and adjustment costs will be offered in a separate cost estimate and charged if necessary!

Do not carry out any adjustment

The device is returned unadjusted with an “as-found” calibration certificate.

Carry out adjustment

The device will be adjusted and delivered together with the pre- and post- calibration certificate. The costs for the post-calibration are 50% of the calibration price for ISO calibration certificates and 80% of the calibration price for DAKkS calibration certificates plus the costs for the conducted adjustment of max. EUR 400.00.

In the case of higher adjustment costs, you will receive a cost estimate from us.

Remark:

Cost estimate required

You will receive a cost estimate for the adjustment costs and the subsequent recalibration.

In case an adjustment is required, I hereby agree with the procedure as selected above.
